New Products

Check out our list of contents containing NEW products. As always, we strive to manufacture a higher class of analytical standards at a fair price. Our focus is and always has been to create precise standards faster and more affordably than other manufacturers. When creating NEW products, Inorganic Ventures continues to keep in mind our customers' specific needs, and with this we will continue flexing to your specs.

Our NEW products are highlighted throughout our catalog with the symbol:

Quality

A history of accreditation. For more than 13 years, Inorganic Ventures has been accredited by A2LA to ISO Guide 34 & ISO 17025. These are the core standards of the analytical testing community, and Inorganic Ventures continues to lead the way in obtaining and developing these quality standards. This means every CRM is engineered to be stable, compatible, NIST traceable and manufactured and tested under ISO Guide 34 & ISO 17025 guidelines.

Registered to ISO 9001 since 1996, we have developed our quality management system to include four robust quality objectives that are an integral part of our daily operations. They are:

- **Customer Satisfaction: No justified customer complaints**
- **Every order will ship on time**
- **Complete and accurate testing of all our products**
- **Defect-free processing**

Our Quality Statement:

We will “flex to the customer’s specs” and strive to exceed the customer’s expectations regarding our products and service.

Customs

Fast, credible, cooperative. Our vast experience in custom blending allows us to create precise, distinctive CRM blends quickly and ship them anywhere in five business days or less.

Did you know that Inorganic Ventures has the capability of producing certified analytes on various filter paper and other solid media?

And More...

On the web. Our technical library has been expanding for over a decade. Topics include ICP operations, sample preparation, trace metals analysis and much more.* There you’ll discover the best online tool for analytical chemists with our Interactive Periodic Table. It includes chemical compatibilities, preferred lines, major interferences and additional data for 70+ elements. inorganicventures.com/tech-center

In the lab. All products ship with the required SDS and Certificate of Analysis. Additionally, our stock SDSs and CofAs can be found on our website for current lots as well as many older ones.

CERTIFICATE OF ANALYSIS

1.0 ACCREDITATION / REGISTRATION
INORGANIC VENTURES is accredited to ISO Guide 34, "General Requirements for the Competence of Reference Material Producers" and ISO/IEC 17025, "General Requirements for the Competence of Testing and Calibration Laboratories" through a contract with an ISO 9001 registered manufacturer (A2LA Global File Number 21018).

2.0 PRODUCT DESCRIPTION
Product Code: Single Analyte Custom Grade Solution
Catalog Number: CGGD1
Lot Number: J2-GDD1986
Name: 7% (w/v) GdCl₃
Value / Assay (µg/mL): 1.037 µg/mL vs. Gd
Starting Material: GdCl₃
Starting Material Lot#: 1888
Starting Material Purity: 99.999%
Certified Value: 999 ± 2 µg/mL
Certified Density: 1.037 g/mL (measured at 20 ± 1°C)

3.0 CERTIFIED VALUES AND UNCERTAINTIES

Assay Information:
Assay Method #1: 999 ± 2 µg/mL
ICP-AES, 1027.076 nm L_{am} (Lot Number: 182288)
Assay Method #2: 999 ± 2 µg/mL
ICP-AES, 1027.076 nm L_{am} (Lot Number: 182288)

* The Calculated Value is a value calculated from the weight of a starting material that has been certified directly via a National Institute of Standards and Technology (NIST) SRM. See Sec 4.2 for further details.
The following sections are used in the calculation of the certified value and for uncertainty. Reported uncertainty represents expanded uncertainty measured at approximately the 95% confidence level using a coverage factor of k=2.

Identification of CRM by an Independent Institute
The CRM is identified by the name of the element and the concentration of the element in the CRM. The name of the element and the concentration of the element in the CRM are listed in the table below.

Identification of CRM by an Internal Institute
The CRM is identified by the name of the element and the concentration of the element in the CRM. The name of the element and the concentration of the element in the CRM are listed in the table below.

Certificate of Analysis (CoA)

Nearly every CRM we manufacture includes a highly detailed Certificate of Analysis. As an ISO Guide 34, A2LA accredited manufacturer, we provide certificates that include extensive data to meet the quality requirements of any laboratory:

- **Traceability** — to specific NIST SRMs and lots
- **Certified Values** — based on two independent methods
- **Trace Impurities** — listed with the actual values
- **Uncertainties** — detailed information reported

ONLINE

All CoA and Safety Data Sheet (SDS) information is now available online, 24/7. Inorganic Ventures is also pleased to announce that all of our products are GHS compliant and our SDSs are available in nine different languages.

We're here to help. We don't just manufacture inorganic CRMs, we also provide technical support when it is needed so you can do your job. Because inorganic chemistry is all we do, Inorganic Ventures has a dedicated technical support team that can assist you with hundreds of topics: sample preparation, method development, ICP and ICP-MS measurement issues and much more. You'll be amazed when you talk to a real person with a technical background ready to help you.

Our technical advisors are available to assist you Monday through Friday, 8:00 a.m. to 6:00 p.m. EST.

We can assist you with...

- Sample preparation
- Spectral interferences
- Chemical compatibilities
- Various ICP & ICP-MS measurement issues

OUR GUARANTEE

Unquestionable integrity.

We believe in our products. And we value our customers. That is why every order leaving our facilities includes our "Declaration of Integrity." This document guarantees your satisfaction. Simply said, if you're dissatisfied with your order for any reason and we cannot work through the problem with you, a full refund will be issued, no questions asked.

INORGANIC VENTURES™

Declaration of Integrity

While our reputation is nearly perfect, we are not infallible. That is why every order we ship includes this document. Herein we state, in no uncertain terms, that we are 100% accountable for the quality of our standards and service.

Therefore, if you are dissatisfied with your order for any reason, tell us. We will resolve the situation in whatever way works best for you:

- A full refund
- Complimentary technical services
- A replacement item rushed to you at no cost

Our company was founded on integrity. If our standards are not measuring up to yours, we want to know.

TCT™

TRANSPIRATION CONTROL
TECHNOLOGY

The cornerstone of the scientific community is accuracy. That's why Inorganic Ventures has always been committed to producing the industry's most exact Certified Reference Materials.

But our control...and the control of every standard manufacturer...ends shortly after a standard is calibrated and packaged. We are improving the way we deliver our quality standards.

What is transpiration?

Transpiration refers to the passage of water vapor through the walls of a container and/or evaporation from the container opening. Transpiration results in an increase in the concentration of the CRM/RM.

What is the solution?

Transpiration Control Technology extends the shelf-life of the product. Inorganic Ventures uses a specially designed aluminized bag that prevents an increase in concentration of the CRM/RM until the TCT bag is opened.

How it works.

The sealed TCT bag stops the loss of water vapor from the bottle when equilibrium is reached inside the bag.

Has the product changed?

The product has not changed, it is the same high-quality product you have come to depend on from Inorganic Ventures. It is the same but only better. TCT is an investment we are making to extend shelf life and give you more control at no extra charge. Our products and unconditional guarantee remain the same.

What this means for you.

When you order stock standards from Inorganic Ventures, your product will be delivered in the TCT bag. This means you will be in control of the expiration date. Upon receiving the product, do not open the TCT bag until you are ready to use. To find out how long the product can be in the TCT bag before it expires, simply check the lot expiration found on the bottom left of the front label. Your product will expire on that date or one year after opening the sealed TCT bag, whichever comes first.

TCT
TRANSPIRATION CONTROL TECHNOLOGY

Transpiration Control Technology extends the shelf life of the product. Inorganic Ventures uses a specially designed atomized bag that prevents an increase in concentration of the ClO₂ until the TCT bag is opened.

YOUR EXPERIENCE
In effect, this puts you in control of the expiration date, which is one year from opening the sealed TCT bag or the expiration date, whichever comes first.

HOW IT WORKS
The sealed TCT bag stops the flow of water vapor from the bottle when equilibrium is reached inside the bag. Inorganic Ventures guarantees the integrity of the product one full year from opening the sealed TCT bag under normal conditions without compromising quality or risking transpiration.

HAS THE PRODUCT CHANGED?
NO
It is the same high-quality product you have come to depend on from Inorganic Ventures.

SAME AS ALWAYS
TCT is an investment we are making to extend shelf life and give you more control at no extra charge. Our products and unconditional guarantee remain the same.

CUSTOM STANDARDS

Speed. Credibility. Cooperation.

We can prepare almost any inorganic blend within the boundaries of science. Whether you need two analytes or 20, milliliters or liters, 0.001 $\mu\text{g/mL}$ or 10,000 $\mu\text{g/mL}$, we can make it for you — fast. It's our specialty.

Customization — The most prominent way that we flex to your specs.

Our catalog reveals only a fraction of the inorganic solutions we're able to make. Much of our business is devoted entirely to custom blending. Laboratories across the globe trust us exclusively to manufacture their inorganic standards.

Fast

Our specialization in custom blending means faster service without sacrificing quality. Our experienced technicians can identify stability and compatibility issues before production even begins. Almost every blend we make is prepared, certified and shipped in five business days or less.

Credible

Since 1999, our tri-tier ISO quality system has ensured that every standard we make is engineered to be stable, compatible and easy to use. These international accreditations guarantee that you're receiving a true Certified Reference Material.

- **ISO Guide 34** ensures the reliability of our reference materials.
- **ISO 17025** ensures the competency of our laboratory.
- **ISO 9001** ensures the quality of our services.

Cooperative

Speed and credibility often come at a higher price. We offer specialized purchasing options and other incentives to better accommodate your budget. Just ask. We're happy to manufacture nearly any solution in bulk quantities. This prevents the need for repeat labor, which means you'll save money. Plus, there's no waiting when you reorder the material — it'll ship the day you order.

1

REQUEST your customs.

Generate and request any number of custom solutions at inorganicventures.com. Or call in your request to 800.669.6799 and discuss your needs with a specialist. You may also fax the quotation request form to 540.585.3012.

2

REVIEW our quotation.

Often you'll receive our pricing within hours. If you like what you see, place your order by phone, fax or web. However, if you're not happy with our quoted price, let us know. We may be able to better accommodate your budget.

3

RECEIVE your order.

Ninety-nine percent of the custom orders we prepare ship in five business days or less. If we expect it to take longer, we'll let you know. When your need is truly urgent, we offer RUSH manufacturing* at no additional charge — just ask. Plus, everything we make is backed by our Declaration of Integrity. Your satisfaction is 100 percent guaranteed for the lifetime of the solution.

*Arrival time is 48 to 72 hours when you specify RUSH manufacturing.

For the pharmaceutical industry, Inorganic Ventures has developed CRMs to comply with the United States Pharmacopeia (USP) general chapters on elemental impurity USP <232> limits and USP <233> procedures. These methods are for testing inorganic impurities in pharmaceutical products by ICP/MS. The International Conference on Harmonization (ICH) Working Group on Elemental Impurities is in the process of developing a harmonized approach for controlling these impurities as well.

Now, YOU control the expiration date.

With TCT, concerns about shipping and storage conditions are eliminated, as transpiration is no longer an issue. This saves you money and simplifies research by removing the need to constantly inventory and restock CRMs.

Find out more at inorganicventures.com/tct.

If you've been searching for an atypical Ion Chromatography standard, look no further.

Over the years, we've developed the most complete line of IC standards on the market. Our technicians have stabilized more than a dozen rare anion and cation standards that you won't find anywhere else.

Shared Knowledge —

The most rewarding part of how we flex to your specs.

Each pH standard is manufactured to be compatible with your instrumentation and meets all requirements for calibration by a true Certified Reference Material. Each standard is traceable to a NIST SRM and engineered to homogeneity and long-term/short-term stability testing. Manufactured under our ISO 17025 and Guide 34 accreditations and ISO 9001 registered, each pH standard comes with a CoA with a temperature chart for your convenience. Each pH standard comes with a CoA with a temperature chart for your convenience. Detailed error budgets provide accurate and consistent certified values and uncertainties. Each product is packaged in our TCT technology, where each lot has up to a three- to four-year shelf life and a one-year expiration date from opening. Also provided is a GHS-compliant SDS and GHS label and temperature chart on the product and TCT foil bag.

Dissolution Reagents

Dissolution Reagents are designed for the preparation and measurement of samples containing silica mixed with fluoride insoluble elements, including zeolites, alumina and/or silica based catalysts, sand, limestone, coal fly ash and talc. The dissolution of these types of materials requires HF. See the article titled *Elemental Analysis of Zeolites* on our website for more information.

Acid Dissolution Reagent	
UA-1-500ML	Volume: 500 mL
Recommended for the dissolution of aluminosilicates, such as zeolites.	

Acid Dissolution Reagent [†]	
UA-2-500ML	Volume: 500 mL
Designed to dissolve coal fly ash and aluminosilicates.	

Acid Dissolution Reagent*	
UA-3-500ML	Volume: 500 mL
Similar to UA-2, except UA-3 can handle higher levels of iron.	

Acid Dissolution Reagent	
UA-4-500ML	Volume: 500 mL
Designed for the dissolution of aluminosilicates, such as zeolites, containing moderate to high levels of fluoride-insoluble elements.	

Acid Dissolution Reagent	
UA-5-500ML	Volume: 500 mL
Designed to handle samples high in calcium, such as limestone.	

Acid Dissolution Reagent	
UA-6-500ML	Volume: 500 mL
Designed for samples high in magnesium, such as dolomite.	

Acid Dissolution Reagent	
UA-7-500ML	Volume: 500 mL
Designed for the determination of trace elements in samples containing predominately silica, such as silica gel.	

[†]Boron cannot be determined.

*Boron and Phosphorus cannot be determined.

Neutralizers & Stabilizers

These products are applicable to the determination of aluminosilicates containing various elements. For details, refer to the description for Dissolution Reagents on the preceding page.

Stabilizing Reagent	
UNS-1-500ML	Volume: 500 mL
UNS-1-2.5L	Volume: 2.5 L
Designed for use with UA-1.	

Stabilizing Reagent	
UNS-2-SET	Volume: 2.5 L
Two reagent set consisting of equal amounts of UNS-2A and UNS-2B. Recommended for use with UA-2, UA-3, UA-4, or UA-5.	

Stabilizing Reagent	
UNS-2A-2.5L	Volume: 2.5 L
Stabilizing Agent	

Stabilizing Reagent	
UNS-2B-2.5L	Volume: 2.5 L
Stabilizing Agent	

Stabilizing Reagent	
UNS-3-2.5L	Volume: 2.5 L
Designed for use with UA-7.	

Stabilizing Reagent	
UNS-4-2.5L	Volume: 2.5 L
Prevents salting-out effects from borate fusions and/or boric acid treated HF preparations. Also recommended for use with UA-6.	

Stabilizing Reagent	
UNS-100-500ML	Volume: 500 mL
UNS-100-2.5L	Volume: 2.5 L
For use with all acids and applications. Improved capacity. Contact us for more information.	

Stabilizing Reagent	
UNS-300-2.5L	Volume: 2.5 L
For use with all acids and applications. Improved capacity. Contact us for more information.	

Fusion Fluxes

Custom fusion fluxes are available upon request.

Lithium Carbonate	
FF-LI2CO3-500G	Volume: 500 g
FF-LI2CO3-2.5KG	Volume: 2.5 Kg
See section 13 of the Reliable Measurements Guide found on our website for a sample preparation method designed to work perfectly with this product.	

CERTIFIED TITRANTS AND REAGENTS

Export Orders

We have representation in countries across the globe. Contact your distributor for regional pricing, orders and additional catalogs. Visit our website to find the distributor in your area.

Our Guarantee

As stated in our Declaration of Integrity (see pg. 7), if you're dissatisfied with your order for any reason, we'll resolve the situation in whatever way works best for you:

- A full refund;
- Complimentary technical services; or
- A replacement item rushed to you at no cost.†

Returns, Exchanges and Damaged Goods

Situations not covered under the terms of our guarantee (above) may require a return and/or exchange of the product. Refunds, replacements and exchanges are considered at management's discretion. Items will only be accepted for return or with a valid return authorization number. Contact us to receive this number.

All transportation and packaging expenses on returned or exchanged items are assumed by the customer. Credit for returned items is subject to a modest 15% restocking charge. Credit will not be issued until it is determined by our inspection that returned items are unused and undamaged. All returned items must be received within 60 days of the original invoice date.

If carton is received in a conspicuously damaged condition, alert carrier and refuse acceptance.
