An ISO 9001 Certified Company

# Introduction

This catalogue is complementary to the MBH catalogue of solid reference materials. It provides an extensive listing of solutions for ICP-AES, ICP-MS and AAS spectroscopy, as well as glassware and accessories for many makes of ICP instrument. A range of viscometer tubes, viscosity and reference oils are also presented.

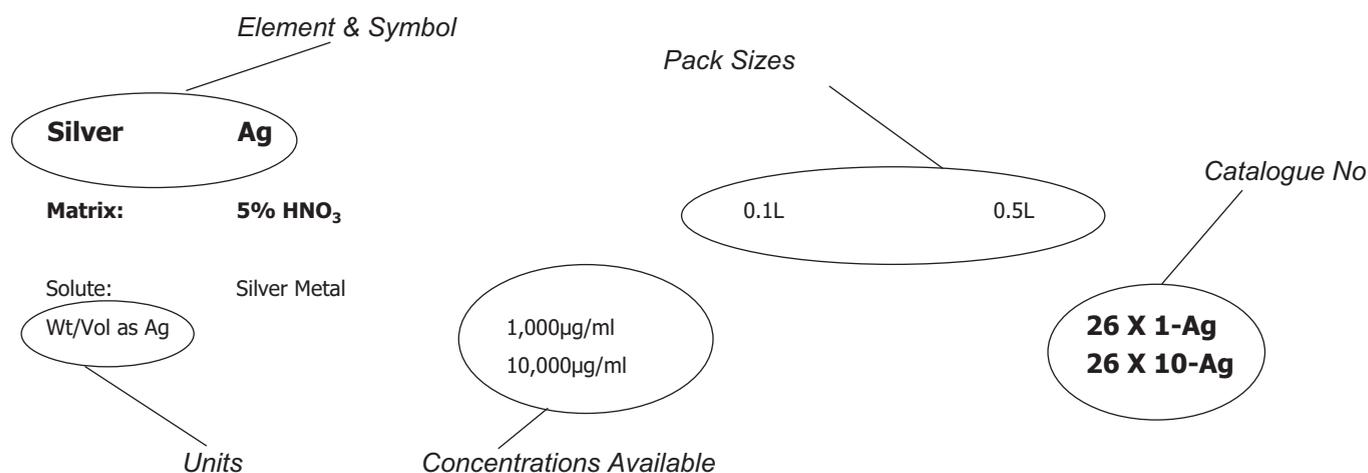

The catalogue lists both organometallic and aqueous solutions supplied under MBH's own label. These solutions are manufactured by an ISO9000 certified manufacturer.

In addition to MBH's own-labelled products the catalogue includes products manufactured or supplied by other parties e.g., Conostan and Meinhard Glass products. The suppliers are listed below.

The catalogue is divided into sections, as described on the Index page, intended to make finding your desired product easy. The number listed includes the manufacturer's own identification in the alpha numeric string, e.g., Conostan S21 organometallic multi-element solution has the catalogue number 252 C-S21. This together with the quantity/volume makes up the full MBH product reference.

Entries list as much information as is known about the material in order to assist with decisions as to the most appropriate product for an application. Where possible entries include data on solute material and matrix. Where the matrix is unchanging, as in single element organometallic solutions, the information on the matrix is given at the beginning of the catalogue section. The solutes for organometallic solutions are not listed as this is proprietary information and is not available to MBH.

Entries for solution products take the general form illustrated below.

In cases where more than one pack size is available the catalogue number includes a #, where this descriptor requires substitution of the pack size to create the full product description e.g., 26 X 10-Ag-.1L is the product description for a 100ml bottle of 10,000ppm silver reference solution for ICP purposes.

# Product Information

## General

### Product Certification

Original Certificates of Analysis are provided for all solutions. Certificates of Analysis for all MBH products provide information defining the identity of the material, matrix and solution concentration. All solutions are analysed, after formulation, to determine the final concentration values written into the certificate. All MBH certifications are traceable to NIST standards.

### Product Lifetime

MBH labelled aqueous solutions are warranted until the date indicated on the bottle and certificate, or 12 months from the date that the bottle is first opened, whichever is the sooner. The product label provides space for you, the customer, to enter the date of acquisition as well as the date of first use. This assists with the requirements that many laboratories have in respect of their ISO / EN17025 laboratory accreditation systems. MBH strongly recommends that laboratories make use of this facility.

Products supplied from other producers will generally be warranted for 12 months from the date of supply.

### Custom Solutions

MBH Analytical can provide Aqueous, Ion Chromatography and Organometallic Reference Solutions customised to your individual specification, both in terms of element selection and elemental concentration. Please note that some combinations may not be possible due to elemental interaction or matrix incompatibility.

Specification forms for these solutions are to be found in the relevant section. Please photocopy the appropriate appendix, complete it (one for each solution requested) and fax it back to us. Or call to discuss your requirements on 020 8441 2024 / [info@mbh.co.uk](mailto:info@mbh.co.uk)

## Conditions of Sale

All materials are sold subject to our conditions of sale which are printed on the reverse of each quotation and order acknowledgement. The text is repeated here for your convenience.

1. All items listed in our catalogue or otherwise offered for sale are subject to availability and any delivery dates that may be quoted are conditional on supplies from manufacturers. We are unable to accept any liability for delay and if any item becomes unavailable during the life of a catalogue we will advise you on suitable alternatives where appropriate
2. Unless credit facilities have been agreed with us (in which case payment is due on a net monthly basis), payment for items supplied is due either against a Pro Forma invoice or by Confirmed Irrevocable Letter of Credit.
3. We draw the attention of all customers to the notes in our catalogue relating to definitions, Analyses and Calibration procedures.
4. To the extent that the law may permit, the following condition stands in substitution for all conditions and warranties as to merchantability and fitness for purpose as implied by statute, common law or otherwise.
  - a. It is the responsibility of the customer to decide on the suitability and fitness for purpose of all items purchased.
  - b. Any items claimed to be defective must be returned to us (within 3 months of delivery) for examination and analysis and no claims can be entertained if this is not done.
5. We may, at our option, replace any item shown to be defective or refund the price paid. Our liability in respect of any such item will not in any circumstances exceed the amount paid for the item in question and no liability is accepted for consequential loss however arising.
6. These conditions shall apply to all contracts entered into by us to the exclusion of all other conditions and notwithstanding any terms that may appear on any printed stationery of any customer. No variation of these conditions shall be effective unless confirmed by us in writing on or prior to formal acceptance by us of any order.
7. Until such time as we have received full payment, items supplied to customers shall remain our property notwithstanding delivery to the customer and we shall be entitled to enter upon the customer's premises to recover the property if the customer shall go into liquidation, or if a receiver is appointed on the undertaking of the customer or any of his or its property.
7. The contract shall be governed by English law and any disputes shall be referred to the exclusive jurisdiction of the English Courts.

# Orders

## Procedure

Orders are accepted by mail, fax, e-mail or phone. Please ensure any subsequent confirmation of an order is appropriately marked so as to avoid duplication

Orders placed shall include the following information:

Catalogue Number, Quantity Required, Brief description, Price (if known) and confirmation of Invoicing and Delivery addresses. Unless specifically instructed otherwise all orders are despatched by our chosen, most appropriate, carrier with due regard to destination, security, speed and cost.

Send your order to:

**MBH Analytical Ltd**  
**Holland House**  
**Queens Road**  
**BARNET, Herts EN5 4DJ**  
**England**

**Tel: +44 (0) 20 8441 2024**  
**Fax: +44 (0) 20 8449 0810**  
**E-mail: [sales@mbh.co.uk](mailto:sales@mbh.co.uk)**

## Prices

The MBH Price List is issued as a separate publication. All prices are stated in pounds sterling and exclude despatch and UK V.A.T. (see below)

Upon request quotations can be provided in US dollars or Euros. However we reserve the right to withdraw quotations made in these currencies in the event of excessive exchange rate movements.

## Hazardous Goods

### IMPORTANT – Please Note

Some materials listed in this catalogue must be treated as hazardous for the purposes of despatch. For these materials we use special packaging and transport and will gladly confirm the costs involved upon enquiry.

We must follow the International 'Dangerous Goods' Regulations, and can only consign these materials by air freight. They CANNOT be despatched by international Courier e.g., FedEx, UPS etc.

## Packing, Insurance and Freight

Packing is included in the price of the goods. Freight is charged at cost. We will be pleased to forward our quotation detailing these costs upon request. Insurance can be arranged when required at extra cost.

## Value Added Tax ( VAT )

All orders delivered to a UK address are subject to VAT at the rate applicable at the time of despatch. European Union customers are also subject to UK VAT. Unless we are advised of your VAT number at the time of placing your purchase order this will be charged at the rate applicable.

MBH Analytical Ltd is registered for UK VAT – Registration Number GB 873 1047 32

## Payments

Payment can be made by any of the following:

- By Visa Purchasing Card or major Credit/Debit cards (Visa or Mastercard).
- Sterling prepayment with your order against our Pro Forma invoice by Bankers Draft or Automated Bank Transfer.
- By irrevocable Letter of Credit through a British bank, payable on sight upon presentation of invoice and despatch documents.
- Established customers may apply to receive strictly Net Monthly Account terms, subject to satisfactory bank and trade references.

Our Bank details are:

Name of Banker: **National Westminster Bank plc**  
Address: **181 Darkes Lane**  
**Potters Bar**

# CERTIFICATE OF ANALYSIS

## Single Element Reference Solution

Element: **Sodium (Na)**

Product No: 26 X 1-NA .1L

Certified wt/vol Concentration: **1,000 µg/ml\***

Lot No: 801-0146RR

Certified wt/wt Concentration: **982 µg/g**

Matrix: 5% HNO<sub>3</sub>

Expiration: Earlier of **18 months** or 12 months from date opened

DATE OPENED

This solution is intended for use as a calibration standard for plasma emission spectroscopy (ICP or DCP), inductively coupled plasma mass spectroscopy (ICP-MS), or atomic absorption spectroscopy (AA or GFAA). This solution was prepared gravimetrically to contain nominally 1,000 µg of sodium per ml of solution. The certified concentration is based upon gravimetric procedures, i.e., weight per volume composition of 99.999% pure sodium carbonate (Na<sub>2</sub>CO<sub>3</sub>) dissolved in high purity nitric acid (HNO<sub>3</sub>) and diluted with filtered (0.22µm) 18 megohm deionized water. The uncertainty associated with the certified value is ± 0.3% relative which is the sum of the estimated errors due to the purity of the raw material, the gravimetric preparation of the solution, and transpiration of the solution through the container wall.

**Traceability:** This standard was manufactured under an **ISO 9002** certified quality system. The balance used to weigh the raw material is accurate to ± 0.0001g and is calibrated regularly using mass standards, which are traceable to NIST according to ME Report No. 3819ME and NIST Test No. 39760. All volumetric dilutions are performed in class A glassware which is recalibrated regularly according to NIST recommended procedures. In order to verify the concentration, the final solution was checked by plasma emission spectrometry (ICP or DCP) against **NIST SRM 3152a, lot #10728**. Trace level elements and impurities, in the final solution, were also determined by ICP-AES or ICP-MS. MBH guarantees the accuracy of this solution until the expiration date, provided it is kept tightly capped, and stored and used in accordance with good laboratory practice.

**Recommendations:** To achieve the highest accuracy, the analyst should prepare fresh working solutions daily, by making serial dilutions. We recommend that the solution be thoroughly mixed, by shaking the bottle, immediately prior to use. All glass or plastic surfaces, which come into contact with the solution, must have been previously cleaned in accordance with good laboratory practice. Dilutions should be made with certified volumetric class A flasks and pipettes and with the same matrix as the original standard.
